

## Introduction to Trauma Informed Care Online Training Modules

### Module 4: A Brief Overview of NEAR Science

#### **Suggested questions for consideration and/or discussion**

*After you view the video content for this module, we invite you to use this set of questions for personal reflection, or to guide a group discussion. If you use these questions in a group, we encourage you to also create group agreements pertaining to confidentiality, group dynamics and expectations, and opportunities for follow-up.*

1. Do you have any resistance to learning about NEAR Science?
2. Do you think there is value added to your organization by sharing the findings of the four sciences with those you serve? Can you imagine how that might be done?
3. Which of the four sciences would you like to learn more about. What steps will you take?
