

Trauma Informed Care Logic Model

Assumptions

1. Human service settings are populated with people (service users and staff) with experience of past or present trauma.
2. Services and settings can be re-traumatizing for individuals when they feel unsafe or don't feel that they have control, power, choice, voice, or value.
3. Trauma informed care takes these challenges into account and creates services and settings that are safe, empowering, trustworthy, collaborative, and responsive to cultural, historical, and gender issues (based on TIC principles).
